

# dark ecologies *“find it” activity*

## can you find...

- [ ] something that you might also find in a library?
- [ ] a necklace for a giant?
- [ ] something that came from the sea?
- [ ] an unusual place for a nest?
- [ ] different kinds of animals? How many animals can you find?
- [ ] the steps the artist used to make the crystal shapes on the necklace?
- [ ] a string of teardrop shapes? What colors do you see?
- [ ] a person who works here? If you have a question or something to share, they would love to hear from you.
- [ ] colored pencils? Draw your favorite thing in the exhibition on the back of this sheet.

## did you know...

*Ecology* is “the branch of biology that deals with the relations of organisms to one another and to their physical surroundings”, or “the political movement that seeks to protect the environment, especially from pollution”.

*Kiln-glass* (or *Kilnforming*) is just that: glass formed in a kiln, usually at temperatures between ~1250 – 1600°F.

## visitor guide

- **Touching harms the art.** *Please only touch items labeled “please touch”, handle objects gently, and put objects back in their homes.*
- **Be aware of your surroundings.** *Please respect other visitors by moving slowly and carefully.*
- **Stay close to your family and friends.** *Share your ideas and talk quietly about your discoveries.*
- **Ask questions! Tells us what you think!** *We love to share information about the artwork and hear your ideas.*
